The rewind starter assemblies used on the models listed, may have been assembled with soft starter pawls.

Outboards within serial group #1 may have been assembled with the wrong starter pawls (no cast mark "2").

Outboards within serial group #2 may have the correct starter pawls (cast mark "2"), however the pawls may not have been properly hardened.

Affected pawls, will show signs of the starter cam wearing a groove into the pawl face within the first 100 hours of outboard operation.

NOTE: A polished line or track on the starter pawl face, indicates normal wear between the starter pawl and the starter cam.
