Special Tools For Mercury Racing Hi-Performance Outboards

Flywheel Puller Tool - 849154T1

Application: For removal of flywheels with a inside thread of 1-1/2"-16 UN-2A.

This improved tool incorporates an inner thrust bearing, which will allow more torque to be applied during removal of the flywheel. This tool may be used in place of flywheel puller 91-73687A1.

Steering Cable Tightening Tool - 91-849969

Application: To tighten the recessed tilt tube nut (port side) on V-6 offshore mid sections.

This new tool, size 1-7/16" can be used to tighten the recessed tilt tube nut (port side). This tool can be slid over the steering cable end to tighten the tilt tube nut. The need to grind down sockets to fit as previously required can be eliminated with the use of this tool.
