## CDS G3 2018 Update 6—Multiple User Issue

### Scope

Worldwide

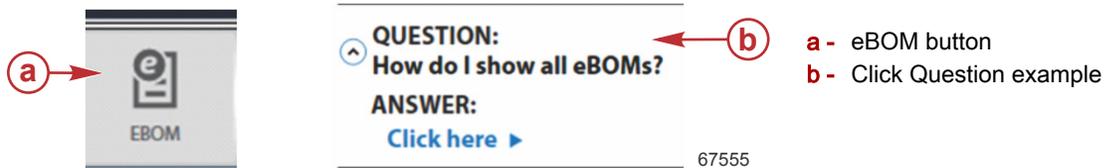

### Situation

CDS G3 Update 6 has a multiple user bug that is now fixed with Update 7.

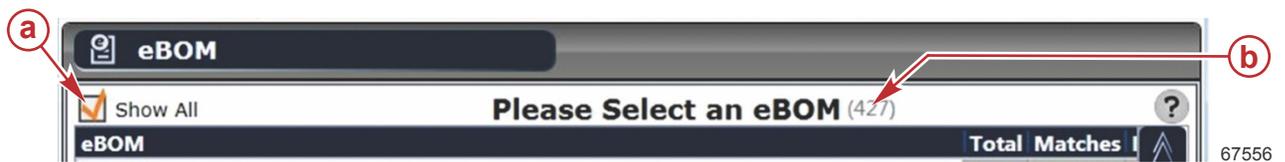

The problem occurs when the user who installed Update 6 can see all electronic bill of materials (eBOMs), but when another user logs in with a different account, all of the eBOMs are not visible. Examples of this situation include:

- CDS G3 software installed with an administrator account.
- Multiple user accounts (multiple users with different logins).

To check if you can view all eBOMs, click the eBOM button or use the Click Question feature.

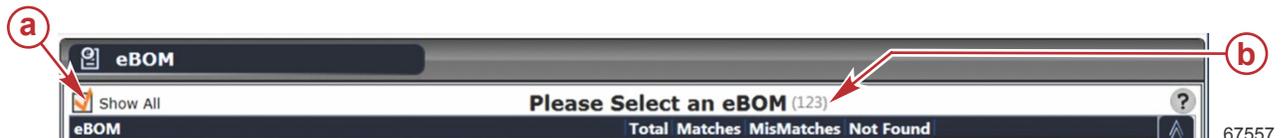

The user who installed the software has access to all 427 eBOMs. Ensure that **Show All** is selected and observe the number shown on the screen.

- a - **Show All** checkbox
- b - Number of eBOMs available (427 in this example)

When another user attempts to view all eBOMs, CDS G3 only displays 123 of the expected 427 eBOMs.

- a - **Show All** checkbox
- b - Number of eBOMs available (123 in this example)

## Correction

To correct this issue, uninstall CDS G3 2018 and reinstall the full version.

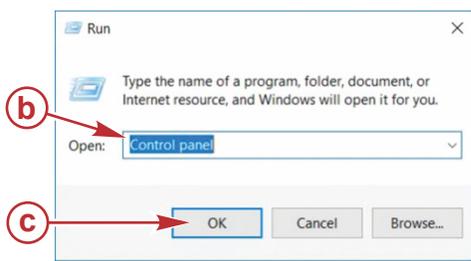

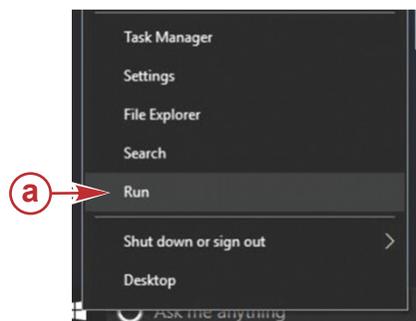

1. Find the License key and dealer information by selecting **Help**, then **About** from the top menu in CDS G3. The following screen will be displayed.

- a - Version number and literature viewer installation status
- b - Dealer information and account number
- c - Account validation expiration date and button to manually perform validation
- d - Computer name, license key, and **Deactivate Machine** button
