NXT¹ Transmission Warranty and Repair

Repair

Effective February 16, 2009, all Mercury dealers will be required to repair the transmissions in NXT¹ power packages when the monetary value of the transmission repair is less than the cost of a replacement transmission.

A complete list of tools required to repair the transmission can be found in the Mercury Racing special tools catalog that was supplied to all dealers. An electronic version is available through MercNet as well.

Warranty

Mercury Racing will not honor requests for warranty on the transmission if the engine has been modified to create more horsepower or torque than was originally delivered from the factory.
